

# TAU

a server-less messenger for full freedom of communication

<https://t.me/iMorpheusTau>

<https://github.com/Tau-Coin>

Sept 2020

TAU Cambridge Ltd

Cambridge Science Park, UK

#Open Source

#blockchain #dht #messenger #mobile-mining #server-less #unblock-able #uncensored #permission-less #p2c #pot #decentralized

**The problem: “Big Techs” control communication,  
so they can ...**

- Over-taxing on wealth generated from digital society
- Restricting free economy by KYC and content control

# TAU rebellion

- Permission-less: smart phones form up swarm network, independent from any central to give **uncensored** communication.
- Equality: enable millions of digital communities **independent** from TAU.
- Without “big-tech”: all digital wealth **goes back** to community members.

# Discovering community wealth through blockchain coins

- Each community issues FIXED amount of coins, through which members make trades and news to build an **economy**.
  - A group of digitally connected people has value.
  - Non-inflatable crypto-coins will discover this potential.
  - The more members join, the higher coin value is.
  - When a commonwealth created, better content and service always evolve.

# **TAU is a server-less, permission-less, high scaling, mobile consensus parallel blockchains technology on following tech stacks.**

- Distributed DAG(Directed Acyclic Graph) holds and links immutable data for both chains and messages.
- TAU Distributed Hash Table from libtorrent provides accessing to D-DAG.
- Proof of Transaction(POT) consensus brings incentive and prevent spam.
- POT on D-DAG resists famous history attack on blockchains.
- Skip-list amortize the searching complexity to  $O(\log N)$  in D-DAG
- UDP provides swarm networking
- Parallel independent chains to support unlimited transaction scaling.
- Progressive image and video frames format live in D-DAG like Git rather than old file systems, to save communication cost.

# Team

**Due to nature of the innovation, we do not disclose team members.**

- Technology skills
  - Data and cryptographic processing
  - Telecom and mobile phone expertise
  - Blockchain consensus and algorithm research
  - Java, c++ and android dev
- Business experiences
  - NYSE and Nasdaq listed tech firm co-founder
  - Committed long term mindset
  - 50 global telegram groups administrators with quarter million users registration
- All source code is open and free, except for the ONE TAU genesis secreete key.
