#blockchain #dht #messenger #mobile-mining #server-less #unblock-able #uncensored #permission-less #p2c #pot #decentralized

**The problem: “Big Techs” control communication,
so they can ...**

- Over-**taxing** on wealth generated from digital society
- Restricting free economy by account and content **control**

TAU rebellion mission

- Permission-less: smart phones form up swarm network, independent from any central to give **uncensored** communication.
- Equality: enable millions of digital communities TAX-free and **independent** from TAU.
- Without “big-tech”: all community wealth **goes back** to members.

Discovering community wealth through blockchain coins

- Each community issues FIXED amount of coins, through which members make trades, services and content to build an **economy**.
 - A group of digitally connected people has value.
 - Non-inflatable crypto-coins will discover this potential.
 - The more members join, the higher coin value is.
 - When a commonwealth created, better content and service evolve.

TAU is a server-less, permission-less, high scaling, mobile consensus parallel blockchains technology on following tech stacks.

- Distributed DAG(Directed Acyclic Graph) holds and links immutable data for both chains and messages.
- TAU Distributed Hash Table from libtorrent provides accessing to D-DAG.
- Proof of Transaction(POT) consensus brings incentive and prevent spam.
- POT on D-DAG resists famous “history attack” on blockchains.
- Skip-list amortize the searching complexity to $O(\log N)$ in D-DAG
- UDP provides swarm networking
- Parallel independent chains to support unlimited transaction scaling.
- Progressive image and video frames format live in D-DAG similar to Git rather than old file systems, to save communication cost, but Git is server based.

Team

Due to nature of the innovation, we do not disclose team members.

- Technology skills
 - Data and cryptographic processing
 - Telecom and mobile phone expertise
 - Blockchain consensus and algorithm research
 - Java, c++ and android dev
- Business experiences
 - NYSE and Nasdaq listed tech firm co-founder
 - Committed long term mindset
 - 50 global telegram groups administrators with quarter million users registration
- All source code is open and free, except for the ONE TAU genesis secreete key.
